

EUROCORR 2019 – Sevilla : ABSTRACT

Coating Process Optimisation – Field of Improvements

Stéphane Etienne :

Engineer Degree from Art & Metier

MBA Duke University

Initial background in free form shapes geometrical analysis.

Join Nordson in 1996 since then fully focusing on discrete coating and μ dispensing applications.

Owner of multiples patents mainly related to process controls.

Coating Process Optimisation – Field of Improvements

Selective and Discrete coating line integration aiming at :

- Process integration and optimisation of equipment landscape
- Smart Co Process communication
- Certitude of process completion

Selective and Discrete coating line drying process revision :

- Definition of a coating drying completeness
- Characteristics of a drying process definition
- Methodologies of accelerating a drying process
- Comparison of drying process, introduction of disruptive profiles
- Methodologies of characterisation of drying completeness
